NetSuite CRM+ Features

Powerful Sales Force Automation

NetSuite CRM+ provides SFA that equips the sales team with an accurate record of each opportunity and its status, a complete view of the prospect and real-time access to every detail.

- Enables the sales team to manage opportunities across status, potential revenue, key contacts, notes, related documents and more
- Provides sales managers with a complete view of all leads and opportunities in the pipeline
- Comprehensive contact and activity management ensures sales has the tools needed to capture detailed records of all interactions—calls, meetings, notes, email and more
- Enables the sales team to convert opportunities into quotes and then sales orders with one click
- Team selling enables tracking of multiple sales roles in each opportunity, including sales reps and managers, sales engineers and specialists
- Document management functionality enables businesses to build and maintain a sales portal with the latest materials, sales guides and product information

Advanced Sales Forecasting and Quota Management

NetSuite CRM+ advanced forecasting and quote management capabilities build reliability, predictability and trust into the sales process.

- Opportunities, quotes and estimates include a forecast category that allows users to categorize the transaction appropriately as low, commit or upside
- Probability-based forecasting offers weighted measurement of pending opportunities, quotes and orders, with the ability to make necessary adjustments as deals progress
- Advanced forecasting tools allow sales reps and managers to self-report forecasting at each level for comparison against pipeline and forecast accuracy
- Makes sales more predictable with real-time forecasting and a system of checks and balances that triangulates the sales forecast
- Order management capabilities provide actual sales and projections of recurring revenue in forecasts and variances

Automated Incentive Compensation Management

NetSuite CRM+ delivers flexible sales compensation management that frees up the sales operations team from time-consuming compensation calculation as well as time spent researching and resolving sales disputes. Dashboards and reports allow you to optimize sales commission spending and effectiveness.

- Easily configure sophisticated sales commission rules based on quotas, sales, quantity, profitability and other criteria
- Set up flexible commission schedules—monthly, quarterly, bi-annually or annually
- Compensation plan flexibility enables easy setup of short-term “SPIFs” to incent specific promotions, as well as supports period-based accelerators
- Provides the sales team with clear visibility into their compensation through summary to detailed commission reports
- Integrates with back-office processes—from sales commission calculation to payment—through NetSuite’s built-in payroll capabilities, or integrates with your existing payroll solution

NUCLEUS RESEARCH

The typical company deploying NetSuite increased sales productivity by 12.5%, and companies can expect to improve productivity by up to 20%.

“NetSuite CRM+ has helped us very quickly transform from a company with different, inconsistent processes from country to country into an organization with a clear, global view of our resources and performance.”

—Teleca AB

Comprehensive Upsell, Quote and Order Management

With NetSuite’s order and quote management capabilities, the sales team can easily convert accurate quotes into approved sales orders, which then flow to your finance system for processing.

- Includes intelligent upsell management in the order-capture process to provide recommendations based on previous buying patterns
- Improves quote and order accuracy by including automated tax and shipping-rate calculations
- Incorporates pricing and discounting rules automatically into the quote process, enabling real-time quote management
- Supports price-level flexibility, including automated quotes based on volume discounts, negotiated pricing, tiered levels, etc
- Accelerates the order management process with online approval and workflow management

Anytime, Anywhere Mobile Access

NetSuite’s comprehensive support for mobile devices—iPhone, BlackBerry or Android (provided by both NetSuite and NetSuite SuiteCloud partners)—ensures that your sales users get real-time access to the business information they need.

- Access the latest business reports and business metrics
- Manage calendar information and accept/decline meetings
- See customer and opportunity details

Integration with Leading Social and Productivity Tools

NetSuite integrates with standard social solutions such as Yammer and Qontext using its SuiteSocial platform, improving collaboration and overall sales productivity. In addition, NetSuite integrates with leading email and productivity tools such as Microsoft Outlook and Google Apps.

- SuiteSocial integration with Yammer and Qontext supports Twitterlike cross-departmental collaboration around opportunities, orders and other transactions
- Microsoft Outlook integration supports calendar and contact synchronization
- Google Apps integration (via Celigo) supports calendar synchronization and contextual access of NetSuite information from within Gmail

Out-of-the-Box Marketing Automation

NetSuite CRM+ automates your entire marketing process across channels, allowing you to better align campaigns and programs with your sales efforts. NetSuite is the only solution to provide true closed-loop ROI reporting, from the campaign cost to the actual revenue driven from it. NetSuite CRM+ enables you to easily target, build, execute and measure the success of marketing campaigns and takes the complexity out of lead qualification and conversion.

- Enables execution and tracking of campaigns rapidly and in real time to maximize the value of your leads and opportunities
- Automates lead capture from multiple sources, including websites, search engines, email, direct mail and events
- Delivers email marketing—from creation to execution to measurement—in one system
- Features full reporting and drill-down to analyze campaign statistics and ROI from the start of a campaign to the final order transaction
- Provides rules-based workflow tools to improve lead conversion by automatically managing and driving lead nurturing programs
- Supports upsell marketing through analysis of historical purchasing combinations or product affinities, providing the perfect foundation for upsell campaigns

Partner Relationship Management

NetSuite CRM+ provides full control over every element of the partnering process, including joint marketing campaigns, lead management, sales forecasting, pipeline management, order processing, and partner commissions and royalties.

- Lead management enables partners to register and track their leads
- Supports accurate, up-to-the-minute partner sales forecasts
- Provides full visibility into all of your partners' leads, orders and sales activities

Customer Service and Support

NetSuite's call center capabilities assign, track and escalate cases to serve customers more quickly and efficiently, while NetSuite's 360-degree customer view gives service and support reps better visibility into customer issues and even empowers them to upsell and cross-sell to drive more business.

- Case management automates the business processes associated with customer support case assignment, management and escalation
- Supports routing and tracking support cases according to product, issue, case type, partner or customer
- Knowledge base helps customers get the answers they need, aids customer rep training and education, and drives service consistency
- Real-time dashboards and reporting to quickly identify percent of calls resolved, monitor first-call resolution (FCR) metrics, analyze customers renewing maintenance, track call volume and trends, and monitor customer satisfaction
- Online self-service enables customer case submissions, status tracking, communications and more
